Hi, We're Bike Citizens and we're looking for a fulltime

Interactive Designer (UI/UX)

for both web and mobile design, with prior experience and with a stron focus on community elements.

Sounds like you? You are just one bikeride away:

We're a team of 25+ running an award winning project in great charming offices based in Graz and Berlin. We started out creating the world's first navigation App focused on urban cycling and being fully offline capable. The next big thing was the "Finn" smartphone mount. There's much more to come...

These are the key aspects of your role:

Create:
Take an active role in co-developing and refining concepts. You will play a central role at the interface between ideas and reality.

Cooperate:
Work closely with our Team (CEO, Development, Marketing) in order to have all important aspects covered.

Inspire:
Inspire the current and future Bike Citizens in a way which encourages them to promote Bike Citizens.

Lead:
You are able to deal with constructive criticism and know how to

hold your point of view and get others enthusiastic about it.

Bike Citizens is an independent, self-made company (owned and run by the founders) and we make our own rules. For example we decided to work only 4 days a week, that means weekends start on Thursday evening!
We keep bureaucracy at a minimum and encourage everybody to get involved, which also means bringing in own ideas and fight for them to get real. We have a strong focus on learning by trying new things and by connecting with others (conferences, workshops).

You're an **ideal match** if you:

- Have prior experience which can be demonstrated via finished projects where you had a leading role
- Are good at creating visually appealing user interfaces from scratch, but are also able to work with constraints, e.g. remain consistent with pre-existing designs
- Have a good understanding of the various non-visual aspects of designs, especially when it comes to mobile
- Know enough about software development to understand constraints/costs related to design decisions
- Use tools and workflows suited for creating and demonstrating dynamic user interfaces
- Are a positive and proactive person
- Want to keep learning and share your know how
- Have good skills in any of: cooking, Wuzzler, chess ;-)

If that sounds like you – we're dead keen to get to know you

Salary: Because of law regulations, we announce the minimum salary as required by collective agreement (min 1.800 € gross/month). Your actual salary will depend on your experience, skills, contribution to Bike Citizens and is to be negotiated. Salary is offered for 36h base, no all-in-contracts.
