About the Speakers

The European Cleantech Internationalisation Initiative (EC2i) integrates the goals and strategies of five leading European cleantech clusters with capabilities spanning value chains emerging at the intersection of environmental technology and digitalization. The main objective of this initiative is to implement a joint internationalization strategy to help SMEs exploit the opportunities for collaboration in two target countries: The United States and China. Website: <https://www.ec2i.eu/>

Umore Cleantech Consulting is a consulting firm focused on international clean technology transfer and investment advisory, connecting global companies to China's market to foster collaborations across government agencies, capitals, and environmental companies by providing tailor-made match-making service including marketing strategy, partner scouting, financial advisory and go-to-market services for smooth landing to the China's market. Website: <http://www.umoregroup.com/>

The CBTC is the business gateway for China-Europe innovation and cooperation, with the following targeted sectors: Life Science, Information and Communication Technology (ICT), Industry 4.0 (Smart Manufacturing). The CBTC serves as a two-way business gateway for both Chinese and Belgian/European companies. CBTC welcomes Belgian - European companies interested in developing their entry in the Chinese market. United Investment Europe (UIE) is the developer and the operator of the CBTC program. Website : <https://www.uieurope.eu>
